Tips to remember before and after you have suffered damage:

- Thoroughly review your insurance policy to ensure you understand the process involving your coverage, deductibles, and responsibilities prior to damage loss.
- Immediately following a loss, mitigate any damage and make any temporary repairs to prevent further damage from occurring. Immediate action can help prevent additional loss and may expedite the insurance claims process.
- Make sure you thoroughly review and understand any contract you sign with a public adjuster. You do not need to sign a contract for the adjuster to help file your claim. You may sign a contract if you choose, but be sure it is necessary in light of the circumstances. The company has a right to inspect the damage prior to repair.
- Make sure you thoroughly review and understand any contract you sign with a public adjuster. You do not need to sign a contract for the adjuster to help file your claim. You may sign a contract if you choose, but be sure it is necessary in light of the circumstances. The company has a right to inspect the damage prior to repair.
